Valuation of Investments (Unaudited)

Portfolio securities are valued using current market values or official closing prices, if available. When reliable market quotations are not readily available or a pricing service does not provide a valuation (or provides a valuation that in the judgment of the Adviser does not represent the security's fair value) or when, in the judgment of the Adviser, events have rendered the market value unreliable, a security is fair valued in good faith by the Adviser under procedures approved by the Board. Valuing securities at fair value is intended to ensure that the Fund is accurately priced and involves reliance on judgment. There can be no assurance that the Fund will obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its NAV per share.

The Regan Total Return Income Fund ("The Fund") follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). The inputs or methodology used in determining the value of the Fund's investments are not necessarily an indication of the risk associated with investing in those securities.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized into three broad categories as defined below:

- Level 1 Quoted prices in active markets for identical securities. An active market for a security is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value.
- Level 2 Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.
- Level 3 Significant unobservable inputs, including the Fund's own assumptions in determining fair value of investments.

Equity Securities that are traded on a national securities exchange are stated at the last reported sales price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Short-term investments classified as money market instruments are valued at NAV. These investments are categorized as Level 1 of the fair value hierarchy.

Debt securities, including corporate, convertible, U.S. government agencies, U.S. treasury obligations, and sovereign issues, are normally valued by pricing service providers that use broker dealer quotations or valuation estimates from their internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risk/spreads and default rates. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Mortgage- and asset-backed securities are securities issued as separate tranches, or classes, of securities within each deal. These securities are normally valued by independent pricing service providers that use broker-dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, estimated cash flows and market-based yield spreads for each tranche, current market data and incorporate deal collateral performance, as available.

- U.S. Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations.
- U.S. Government agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Agency issued debt securities are generally valued in a manner similar to U.S. Government securities. Mortgage pass-throughs include to-be announced ("TBAs") securities and mortgage pass-through certificates. TBA securities and mortgage pass-throughs are generally valued using dealer quotations.

The independent pricing service does not distinguish between smaller-sized bond positions, known as "odd lots", and larger institutional-sized bond positions, known as "round lots". The Adviser reviews pricing from the independent pricing service relative to odd lot acquisitions. If the vendor price is more than 3% greater than the acquisition price of the odd lot, cost is

initially used to value the position. The Adviser monitors market levels and the vendor pricing daily, and will employ the vendor's price when the Adviser believes it represents fair value, or if additional purchases of a security result in a round lot position. The Adviser also monitors current market levels for odd lot positions and updates fair valuations if material differences are observed.

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Fund's Adviser with oversight by the Valuation Designee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Adviser considers, among other things: (1) the last sales price on the securities exchange, if any, on which a security is primarily traded; (2) the mean between the bid and asked prices; (3) price quotations from an approved pricing service; and (4) other factors as necessary to determine a fair value under certain circumstances.

Depending on the relative significance of the valuation inputs, fair valued securities may be classified in either level 2 or level 3 of the fair value hierarchy.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the fair values of the Fund's consolidated investments in each category investment type as December 31, 2022:

Regan Total Return Income Fund

Description	Level 1	Level 2	Level 3	Total
Assets				_
Asset Backed Securities	\$ -	\$ 68,910,213	\$ 242,425	\$ 69,152,638
Mortgage Backed Securities - Agency	-	5,548,121	\$ 477,885	\$ 6,026,006
Mortgage Backed Securities - Non-Agency	-	127,515,032	\$ 2,425,171	\$ 129,940,203
Mortgage Secured Note	-	-	\$ 792,000	\$ 792,000
Short Term Investments	6,307,808	37,752,163	\$ -	\$ 44,059,971
Total	\$ 6,307,808	\$ 239,725,529	\$ 3,937,481	\$ 249,970,818

Please refer to the Schedule of Investments for further classification.

The independent pricing service does not distinguish between smaller-sized bond positions, known as "odd lots", and larger institutional-sized bond positions, known as "round lots". The Adviser reviews pricing from the independent pricing service relative to odd lot acquisitions. If the vendor price is more than 3% greater than the acquisition price of the odd lot, cost is initially used to value the position. The Adviser monitors market levels and the vendor pricing daily, and will employ the vendor's price when the Adviser believes it represents fair value, or if additional purchases of a security result in a round lot position. The Adviser also monitors current market levels for odd lot positions and updates fair valuations if material differences are observed.

Odd lot securities valued at cost are classified as level 2 when acquired within 30 days of the reporting date; odd lot positions acquired more than 30 days prior to the reporting date and valued at cost are classified as level 3.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value.

	Asset Backed Securities		ortgage Backed Securities – Agency	rtgage Backed curities – Non- Agency	Mortgage Secured Note	
Balance at September 30, 2022	\$	268,142	\$ 306,095	\$ 3,800,804	\$	800,000
Purchased		-	182,528	1,315,666		-
Accrued Discounts/Premiums		287	2,388	44,998		-
Sale/Paydown Proceeds		(26,839)	(6,179)	(519,392)		-
Realized Gain (Loss)		1,114	415	28,368		-

Change in Unrealized Appreciation (Depreciation)	(281)	(7,361)	(98,282)	(8,000)
Corporate Actions	-	-	(9,238)	
Transfers from Level 3 ⁽¹⁾	-	-	(2,146,991)	-
Balance at December 31, 2022	\$ 242,425	\$ 477,885	\$ 2,425,171	\$ 792,000

⁽¹⁾ Transfers from Level 3 to Level 2 relate to securities that began the period valued at cost, but became valued by a third party pricing service during the period. The Adviser believes that the value from the pricing service represents the fair value of each security for which the transfer occurred.

The change in unrealized appreciation/(depreciation) for Level 3 securities still held at December 31, 2022 was \$16,066.

The following is a summary of quantitative information about level 3 valued measurements:

Regan Total Return Income Fund

	Dece	Value at ember 31, 2022	Valuation <u>Technique(s)</u>
Asset Backed Securities	\$	242,425	Acquisition Cost
Mortgage Backed Securities – Agency	\$	477,885	Acquisition Cost
Mortgage Backed Securities – Non-Agency	\$	2,425,171	Acquisition Cost
Mortgage Secured Note	\$	792,000	Broker Quotation

The Fund invests in distressed debt securities, which are securities that are priced below \$50. In accordance with GAAP, the ultimate realizable value and potential for early retirement of securities is considered when determining the yield. If current values of debt securities decline significantly from the issue price, computed yields may be higher than rates expected to be ultimately realized. To avoid unsound yield information being presented in the Fund's financial statements, consideration is given to capping yields of individual securities at a reasonable level. The Fund's Adviser performs a periodic assessment of the yields for these distressed securities and adjustments are made to the income and cost of these securities on the Fund's financial statements.
