

Regan Total Return Income Fund | RCTR / RCIRX

January 31st, 2024 | Managed by Regan Capital, LLC

Investment Objective

Regan Total Return Income Fund (the "Fund") seeks to provide a high level of risk-adjusted current income and capital appreciation.

Fund Overview

The Fund is a solution for investors seeking capital appreciation and high current income through a duration-neutral, low credit risk vehicle. By focusing on high-quality, income-producing instruments, this strategy seeks to outperform traditional fixed income with less sensitivity to changes in interest rates and lower credit risk.

Fund Highlights

- Quarterly distributions
- Daily Liquidity
- Duration & interest rate neutral
- Underlying collateral backed by strong housing market fundamentals
- Focus on Senior U.S. Mortgage Bonds
- Seeks high current income
- Limited credit risk
- Bonds de-risk over time as borrowers make monthly mortgage payments

Hypothetical Growth of \$10,000 Through 1/31/24

Growth of \$10,000 is calculated at NAV since inception and assumes that all dividend and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes. Results are not indicative of future performance.

- **Mutual fund investing involves risk. Principal loss is possible. Investments in asset-backed and mortgage-backed securities include additional risks that investors should be aware of, including credit risk, prepayment risk, possible illiquidity, and default, as well as increased susceptibility to adverse economic developments. Investments in debt securities typically decrease when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and nonrated securities present a greater risk of loss of principal and interest than higher-rated securities do. For more information on these risks and other risks of the fund, please see the Prospectus.**

- The Regan Total Return Income Fund is distributed by Quasar Distributors, LLC.
- **30-Day SEC Yield** (Subsidized/Unsubsidized): Represents the net investment income a fund earns over a thirty-day period. This figure is based on the fund's share price at the end of the thirty-day period and is shown as an annual percentage rate. The subsidized 30-day SEC yield represents expense reimbursements and or fee waivers during the period. **The Bloomberg US Aggregate Bond Index** (the "Agg") is a broad-based flagship benchmark that measures the investment grade, US dollar denominated, fixed rate taxable bond market. The index includes Treasuries, government related and corporate securities, fixed rate agency MBS, ABS and CMBS (agency and non agency). **Beta** measures a fund's risk relative to its benchmark. A beta of 1.00 indicates that the fund is as volatile as its benchmark. **Duration** measures the sensitivity of bond prices to changes in interest rates. Bonds with a higher duration experience greater price volatility from interest rate movements. **Volatility** is a measure of the rate of fluctuations in the price of a security over time. It indicates the level of risk associated with the price changes of a security. **Correlation** is a statistical measure of how two securities move in relation to another. Index used for comparison is The Bloomberg US Aggregate Bond Index.
- As of 12/31/2023, both share classes of the Regan Total Return Income Fund received a Morningstar Rating™ of 5 stars (overall and for the three-year time period) out of 286 funds in the Nontraditional Bond Category. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

- The Lipper ratings are subject to change every month and are based on an equal-weighted average of percentile ranks for the Preservation and Expense metrics over three-year period. For each measure, the highest 20% of funds in each peer group are named Lipper Leaders. The next 20% receive a rating of 4; the middle 20% are rated 3; the next 20% are rated 2, and the lowest 20% are rated 1. Lipper ratings for Preservation reflect funds' historical loss avoidance relative to other funds within the same asset class as of December 31, 2023. RCIRX received the following ratings in Lipper's Core Bond Fund classification for both the overall and three-year time periods: total return: 5 (among 303 funds), consistent return: 5 (out of 303 funds), preservation: 5 (out of 6,243 funds), and expense: 1 (out of 192 funds). RCTRX received the following ratings in Lipper's Core Bond Fund classification for both the overall and three-year time periods: total return: 5 (among 303 funds), consistent return: 5 (out of 303 funds), preservation: 5 (out of 6,243 funds), and expense: 2 (out of 46 funds).
